COMPREHENSIVE OVERVIEW OF OUR COMPANY PROFILE

About Holmech Engineering Pte Ltd

Established in 2014, Holmech Engineering Pte Ltd is a trusted private limited construction company specializing in serving the Oil & Gas and Process sectors in Singapore. Headquartered at 71 Toh Guan Road East, #02-03, Tech Centre, Singapore 608598, we have built a strong reputation for delivering high-quality fabrication and installation services tailored to the needs of our clients.

Profile

Our Expertise

As a small yet highly capable construction company, Holmech Engineering specializes in the fabrication and installation of structural steel, process piping, storage tanks and firefighting piping and equipment. Our services are integral to supporting projects in the Oil & Gas and Pharmaceutical sectors, with operations spanning key industrial locations such as Jurong Island, Tuas, and other areas across Singapore.

Our Team

At the core of our success is our experienced team of professionals. Many of our employees and management personnel have previously worked with leading corporations in the Oil & Gas and Chemical sectors, bringing with them a wealth of knowledge and expertise. This ensures that we maintain the highest standards in safety, quality, and workmanship, aligning with industry best practices and client expectations.

expectations.

Our Commitment

Holmech Engineering is committed to delivering cost-effective and risk-reducing solutions to major Engineering, Procurement, and Construction (EPC) companies. By focusing on dependability, efficiency, and quality, we aim to become a preferred partner for construction services in Singapore. Our goal is to support our clients in achieving their project objectives while minimizing risks and maximizing value.

CORE COMPETENCIES

- ❖ Proven ability to mobilize a skilled and qualified workforce at short notice
- ❖ Expertise in executing a wide range of mechanical works, including:
 - **Piping systems (process, utility, and firefighting)**
 - **Mechanical equipment installation.**
 - **Storage Tank fabrication and erection.**
 - **Prefabricated process and pipe rack modules.**
 - **Structural steel works.**
 - **Firefighting systems.**
- ❖ Capability to provide full Project Management Services
- ❖ In-house resources for delivering Engineering and design support
- ❖ Ability to carry out scaffolding works to support piping, structural, and equipment installation activities

Key Strengths

CAPABILITIES & PROJECT EXPERIENCE

We carry out small and medium sized mechanical projects for the onshore oil & gas, chemical, power plant and pharmaceutical industries. Scope of works on our typical projects are

- Installation, alignment and grouting of static and rotary mechanical equipment
- Supply, fabrication and installation of process and utility piping.
- Supply, Fabrication and installation of shop fabricated storage tanks.
- Supply fabrication and installation of process and pipe rack modules.
- Supply, fabrication and installation of structural steel works – like pipe rack, production buildings, warehouses, technology structures
- Supply, fabrication and installation of fire fighting system including sprinkler piping, fire hydrants, hose reels, water and foam monitors, dry chemical skids and dry chemical piping, CO2 fire extinguishing system, FM 200 clean agent fire extinguishing system, IG 541/Inergen fire extinguishing system for substations, Tank cooling sprinklers and foam lines etc. for oil/chemical process plants and storage terminals.
- Providing pre-commissioning and commissioning supports for pre-commissioning and commissioning of process plants

Project Portfolio

COMPREHENSIVE COMPANY CAPABILITIES

Procurement Services

- ❖ Procurement of materials
- ❖ Expediting materials for order procured by client
- ❖ Offsite machining services
- ❖ Offsite bending and rolling services

Construction Services

- ❖ Rental of Blind flanges, pressure gauges, hydrotesting pumps
- ❖ Hydraulic Bolt tensioning and torque tightening services
- ❖ Rental of torque wrenches, torque multipliers ec.
- ❖ On site Flange facing
- ❖ Wrapping and Coating and Holiday detection test
- ❖ Epoxy grouting for pumps and compressors
- ❖ Fireproofing and insulation
- ❖ Tank Fabrication, installation and refurbishment

AREA OF SPECIALIZATION

Comprehensive Structural Steel Solutions

Providing end-to-end services for Oil & Gas, Chemical, and Power Plants

End-to-End Solutions

We deliver **end-to-end solutions** tailored for the **Oil & Gas, Chemical, and Power Plants** sectors, ensuring all aspects are covered from design to installation.

Engineering Support

Providing comprehensive **engineering and documentation support**, we ensure compliance and precision throughout the project lifecycle, meeting all industry standards.

Fabrication & Installation

Our expertise includes **fabrication and installation** of various **steel structures**, such as **industrial production buildings**, and **pipe racks**, ensuring quality and safety.

Roofing & Cladding

We specialize in the **supply and installation** of **roofing and cladding**, enhancing the durability and performance of industrial facilities across different sectors.

**Structure
Specialization**

STRUCTURE STEEL CAPABILITY

Our company offers end-to-end solutions in structural steel works for various industrial sectors, including Oil & Gas, Chemical, and Power Plants. Our specialized services include:

1. Fabrication & Installation

Structural steel works for industrial production buildings, including pipe racks, platforms, and process structures Pipe rack modules and process skids fabrication with integrated piping, weighing, and transportation to site, including lifting into final position Warehouses and maintenance workshops: Supply, fabrication, and installation of structural steel, roofing, cladding, and fascia systems

2. On-site Construction Support

Structural steel strengthening, retrofitting, and field welding Dismantling of existing steel structures or components Site erection works including alignment, grouting, field touch-up, and final painting

3. Engineering & Documentation

Design and engineering, including Professional Engineer (PE) checks and BCA submissions
Preparation of detailed shop drawings, fabrication drawings, and as-built documentation

4. Material Supply & Processing

Procurement of steel materials, bolts, nuts, gratings, handrails, chequered plates, etc.
In-house fabrication services with provisions for hot-dip galvanizing or protective painting

5. Final Installation Works

Supply and installation of miscellaneous steel components such as handrails, gratings, ladders, and access platforms
Site coordination to ensure safe lifting, placement, and final integration into the project infrastructure

Structure

STRUCTURE STEEL CAPABILITY

Notable Projects Delivered

1. Micron Boise Idaho Project – Gradient

- Fabrication and assembly of water treatment modules

2. Pacific Lights Quick Start Power Plant Project

- Construction of warehouse facility

3. SOAR Project – ExxonMobil

- Supply, fabrication, and installation of steel structure for additional tier of pipe rack

4. SABIC Plant

- Construction of mechanical maintenance building

5. Sanofi EVF Facility (Main Contractor: JML)

- Fabrication and installation of structural steel, piping, pipe rack modules, and pipe supports

6. JLEP Expansion Project – ExxonMobil

- Fabrication and installation of pipe rack modules

7. Pfizer API Expansion Project (Main Contractor: JML)

- Supply, fabrication, and installation of 45 pipe rack modules
- Supply, fabrication, and on-site installation of glycol pipe rack modules and related piping

8. BASF SPEED Project (Main Contractor: JML)

- Fabrication and installation of structural steel, piping, and equipment

9. SCSE Project – ExxonMobil PAC Refinery

- Supply, fabrication, and installation of structural steel platforms, crossovers, and miscellaneous steel structures

10. Condy Pipeline Project – ExxonMobil & Sembcorp Utilities

- Disinvestment of pipe rack at Banyan Road

STRUCTURE STEEL CAPABILITY

Structural Steel Project Highlights

1. Huntsman Apex Project Structural steel works for:

MCC Building (including roofing and cladding)

Cooling tower bases and platforms

Wastewater treatment pit

Fire water retention pit

Warehouse building

2. Celanese SEA VAE Project

Installation of purlins, roofing, wall cladding, and fascia for 3-storey Production Building

Renovation of existing warehouse & Handrails for wastewater sump

3. GSK – E-AMOX Dry End Facilities Project

Structural steel works for addition and alteration

Structure

STRUCTURE STEEL CAPABILITY

Structural Steel Project Highlights

4. SLNG Phase 3 Project

Structural steel strengthening works for existing pipe rack structure

5. ExxonMobil – BREM Mitigation Project Structural steel fabrication and installation

6. ExxonMobil – CWT Warehouse Follow-Up Project Structural steel works for warehouse modifications

7. Shell Marina LOBP Project

Miscellaneous structural steel works including:

Supply, fabrication, and installation of link walkway

Strengthening of steel structures inside GMP Building

Extension of loading bay with structural steel

Supply and installation of jack roof for temporary warehouse

MECHANICAL AND PIPING CAPABILITY

We offer comprehensive mechanical and piping services tailored to meet the demanding requirements of Oil & Gas, Petrochemical, Power, and Industrial sectors. Our scope of work includes:

1. Equipment Installation

Installation, alignment, and grouting of static and rotating mechanical equipment (pumps, compressors, blowers, turbines, etc.) Lifting and positioning of heavy equipment and structural modules using certified rigging teams

2. Tanks & Modular Systems

Design, supply, fabrication, and site installation of shop-fabricated storage tanks

Fabrication, painting, shop testing, transportation, and installation of pipe rack modules and process skids

Modular fabrication and integration of process systems, complete with instrumentation and piping

3. Process & Utility Piping

Supply, fabrication, and installation of Carbon Steel (CS), Stainless Steel (SS), Low Alloy Steel, HDPE, and PVC piping systems

Installation of process and utility lines including steam, condensate, nitrogen, cooling water, compressed air, and firewater systems Special welding procedures including welding over live lines to assist Hot Tapping specialists

4. Specialty Services

Welding of exotic materials such as Duplex Stainless Steel and Cu-Ni piping

Flushing, drying, and pigging of pipelines to meet cleanliness and commissioning standards

Piping

Selected Project Experience

1. SOAR Projects – SAR2 Piping Package

Fabrication and installation of piping, steel structures, installation of pumps and marine loading arms

Alteration of towers/columns and tie-in works

2. Sanofi EVF Facility (Main Contractor: JML)

Fabrication and installation of piping, pipe rack modules, and pipe supports

3. JLEP Expansion Project

Fabrication and installation of pipe rack modules

4. ExxonMobil JLEP Project (Main Contractor: JML)

Design, supply, and installation of 15 shop-fabricated tanks (up to 8m diameter × 18m height)

5. Pfizer API Expansion Project (Main Contractor: JML)

Supply, fabrication, and installation of 45 pipe rack modules

Supply, fabrication, and installation of Glycol pipe rack modules and associated piping

Selected Project Experience

6. BASF SPEED Project (Main Contractor: JML)

Fabrication and installation of structural steel, piping, and equipment

7. CRISP Project (Main Contractor: JML)

Fabrication and installation of 12" VTB process line piping

8. ExxonMobil Jurong Refinery

Supply, fabrication, and delivery of jacketed stainless steel pipe spools for air spargers in sulphur pits

9. ExxonMobil Nitrogen Skid Upgradation (LeedNox)

Supply, fabrication, installation, and hot tapping tie-in works inside Jurong Refinery

10. Air Liquide – Nitrogen Supply Plant (SAR1 Plant, Jurong Island)

Disinvestment of 2 existing LIN2 tanks and installation of new LIN2 tanks

Complete piping replacement, testing, and commissioning

MECHANICAL PIPING PROJECT

Additional Project Experience

1. B299–B1 Import/Export Flexibility Project – ExxonMobil Chemicals, Jurong Island

Modification of manhole of the Butene sphere tank

Installation of new pump, suction & discharge piping, and other associated piping in the C4 Area of SCP
Piping works for new marine loading arm at PAC Berth

2. Sulphur Pit Revamp – SRU Plant, ExxonMobil PAC Refinery

Supply, fabrication, and installation of carbon steel lining

Installation of sulphur pit nozzles, steam coils, baffles, and troughs

Fixing of G-studs for refractory

3. Vis-Breaker Area – ExxonMobil Jurong Refinery, Pioneer Road

Fabrication and installation of 4" high-pressure steam piping

Installation of miscellaneous process piping

MECHANICAL PIPING PROJECT

Additional Project Experience

4. Ecolab Tank Farm Expansion – Jurong Island

Fabrication and installation of piping, equipment, pipe supports, valves, and tie-ins
Testing and commissioning of all systems

5. M078 Project – Berth 1, ExxonMobil Refinery, Shipyard Road

Fabrication and installation of piping
Disinvestment of existing piping and metering equipment
Tie-in works for new systems

6. Tank Supply & Installation – Ecolab Tank Farm Expansion, Jurong Island

Supply, fabrication, painting, and installation of:

Three (3) × 120 m³ Carbon Steel Tanks

One (1) × 120 m³ Stainless Steel Tank

7. CRISP Project – PEC (Main Contractor: Techgems)

Installation and alignment of centrifugal pumps

MECHANICAL PIPING PROJECT

Major Project Highlights (Continued)

1. Condy Pipeline Diversion Project – ExxonMobil

Fabrication and installation of structural steel and piping

Installation of Hot Tap & Stopple fittings

Support to T.D. Williamson for executing 36” and 24” Hot-Tapping and Stopple operations

Piping tie-ins, disinvestment of pipe bridge, steel structures, and foundations

2. Jurong Multipurpose Building Project – ExxonMobil Pioneer Road Refinery

Rerouting of Fire Water, Nitrogen, Potable Water, and NEWater lines

Miscellaneous mechanical works

3. SAR2–IPP Project – ExxonMobil PAC Refinery

Miscellaneous balance works on time & material basis including:

- Piping and pipe supports installation

- Pump alignment

- Punch list clearing

- Piping hydrotesting and associated activities

Piping

MECHANICAL PIPING PROJECT

Major Project Highlights (Continued)

4. Celanese Additional Blender Project

Installation of additional blender vessel and vertical agitator

Structural steel modifications

Installation of process and utility piping

Sprinkler system and roofing modifications

5. BASF New Chiller Project

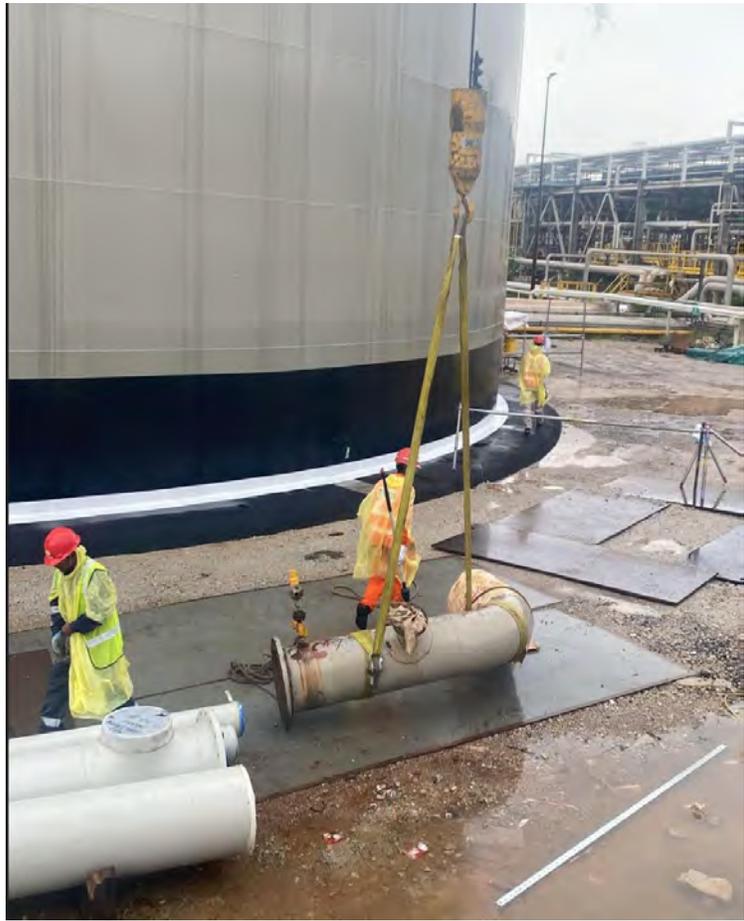

Installation of new chiller package skid and glycol pumps

Allied piping, structural steel works, roofing

HVAC and Fire Fighting system installation

Piping

FIRE FIGHTING SYSTEM PROJECTS

Comprehensive Fire Fighting Systems Services

Expert installation and integration of advanced fire fighting solutions for optimal safety.

Fire Fighting Piping Networks

Installation of **fire fighting piping networks** ensures efficient water distribution for emergency response.

Hydrants and Monitors

We specialize in the **installation of hydrants, monitors**, and associated systems for effective fire control.

Special Suppression Systems

Our team installs **special fire suppression systems** including CO₂ and dry chemical skids for unique requirements.

Control Valves Integration

We ensure the **integration of control valves** and testing for operational readiness of fire systems.

Fire fighting

FIRE FIGHTING SYSTEM CAPABILITIES

1. Fire Water Piping Systems

Installation of fire fighting piping networks for industrial plants, warehouses, and utility areas Fabrication and installation of 2-way and 4-way fire hydrants and associated civil supports

Installation of fire hydrants, monitors, and hose boxes at designated fire points

2. Special Fire Suppression Systems

Installation of Dry Chemical Skid Systems including assembly and field installation Fabrication and installation of foam skids, dry chemical skids, and system integration Installation of deluge valve manifolds and sprinkler piping systems for process areas

3. Gas-based Suppression Systems

Installation of CO₂ fire suppression systems, including vendor-supplied equipment, pipe fabrication, erection, testing, and commissioning Installation of Inergen suppression systems, including integration of control valves, piping, testing, and operational readiness verification

4. Fire Fighting Equipment Installation

Installation of hose reels and fabrication/installation of hose reel piping

Mounting and commissioning of portable firefighting equipment including:

- Dry powder fire extinguishers

- CO₂ fire extinguishers

- Foam tanks, foam proportioners, and foam expansion systems

Fire fighting

FIRE FIGHTING SYSTEM PROJECTS

Fire Protection & Firewater System Projects

1. Celanese SEA VAE Project

Installation of underground main fire water ring

Installation of fire hydrants and fire monitors

2. Shell Marina LOBP and GMP Project

Supply, fabrication, and installation of:

- Fire water hose reels

- Fire hydrants and fire monitors

- Related above-ground firewater piping

3. SLNG Phase 3 Project (Client: Deluge Fire Protection SEA Pte Ltd / Samsung C&T)

Supply, fabrication, and installation of complete fire protection systems for:

- Transformer yards

- LNG storage tank

- BOG compressor building

- LNG booster pump house

- Residual gas blower area

Fire fighting

FIRE FIGHTING SYSTEM PROJECTS

Fire Protection & Firewater System Projects

3. Systems included:

- Deluge valves and sprinkler systems
- Inergen, CO₂, and FM-200 clean agent fire suppression systems
- Dry chemical skids and piping
- Fire extinguishers and hose reels

4. ExxonMobil – BREM Mitigation Project

- Rerouting of stainless steel firewater piping
- Installation of hose reel with cabinet

5. Celanese – Additional Blender Project

- Modification of existing sprinkler piping for integration with new blender installation

Fire fighting

ADDITIONAL MECHANICAL CAPABILITY

In addition to core mechanical, piping, and structural services, we offer a wide range of specialized services essential to the safe and efficient execution of complex industrial projects:-

1. Flange & Joint Management

- Flange face machining services for damaged or corroded flange surfaces
- Flange joint management, including torquing using hydraulic torque wrenches and bolt tensioners to ensure leak-free joints

2. Tie-In & Hot Tap Support

- Execution of tie-ins of all types:
 - Isolate, cut, weld, and bolt-on tie-ins.
 - Welding of Hot-Tap & Stopple fittings.
 - Technical and manpower support to Hot Tap specialist contractors

3. Underground & Coated Piping

- Fabrication and installation of underground piping systems
- Application of wrapping and coating, including Holiday Detection testing to ensure pipeline integrity

Additional

ADDITIONAL MECHANICAL CAPABILITY

4. Structural & Building Envelope Works

- Supply and installation of roofing and cladding systems for industrial buildings and workshops
- Disinvestment and dismantling of equipment, piping, structural steel, and foundations during revamp or decommissioning

5. Heavy Lifting & Rigging

- Heavy lifting operations** of modules, process equipment, and structural steel elements — handling loads **up to 120 MT** using specialized lifting gear and trained rigging teams

6. Inspection & Testing Services

- PMI (Positive Material Identification) using handheld XRF analyzers to verify alloy composition on-site

7. Scaffolding Services

- Provision of scaffolding erection, modification, and dismantling, including supply of certified scaffolding materials and trained scaffolders
- Services aligned with safety regulations and project access requirements
